

Semantic Web

Exercise sheet 11

Social Semantic Web

Exercise 1 (Analysis and Annotation of a Website) (20 points)

Please complete this task in groups of 2. However, group members should upload their results individually.

1. Analyze a website of your choice, in terms of schema.org. Which content can be annotated with which classes and properties? What cannot be annotated?¹
2. Create two schema.org annotations in JSON-LD with two different classes based on your analysis.

¹ Ignore schema.org Actions
